

Care for your Elevate lantern roof

elevate

Thank you for purchasing an Elevate roof from Liniar. This information should be noted before cleaning your roof, to help keep its appearance and operation in optimum condition for many years to come.

- Never lean ladders against PVCu frames, gutters or glass as this may result in damage

All PVCu frames

- Wash frames with a soap and water solution (diluted washing up liquid is fine) to avoid the build-up of grime and atmospheric deposits.
- Avoid solvent-based cleaners and take care not to disturb any sealants.

Self-cleaning glass

- Do not use abrasive or solvent based cleaners on the external glazing surface as the self-cleaning properties may be affected.
- Regular cleaning should not be necessary. However, should you have a build-up of contaminants on the coated surface, hose down the glass and let it dry naturally. It should be sprayed at the coolest part of the day, not in direct sunlight, from top to bottom in a zig-zag pattern.
- To remove stubborn marks, first hose down the glass to remove any dirt then clean with warm, soapy water and a soft cloth followed by a final water rinse.
- If necessary a non-abrasive liquid glass cleaner can be utilised. Rubber squeegees should not be used.
- In hard water areas, hosing down could result in white marks to the coated surface. If this occurs then use a solvent-free diluted detergent with a suitable applicator.
- UNDER NO CIRCUMSTANCES SHOULD A PRESSURE WASHER BE USED
- Care should be taken to avoid paint splash and products of a cementitious nature when decorating externally.
- Under no circumstances should any metal object or harsh chemical cleaner come into contact with the coated surface.
- A proprietary household cleaner may be used on the inside of the glass.

7 great reasons to choose Liniar

Innovative - continual investment in research, development and testing delivers the most advanced products on the market.

Energy efficient - designed from scratch to achieve the pinnacle of thermal performance and retain more heat in your property

Safe and secure - engineered with built-in security features and approved by independent testing facilities
